DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the IC pins in claim 10 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.
2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "12" in figure 3 has been used to designate both waveform circuit and input to AND gate.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

3. Claim 1 is objected to because of the following informalities:

In claim 1, line 14, "secondary said" should be changed to ---secondary side---.

Appropriate correction is required.

4. Claim 10 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim 1 and claim 6. See MPEP § 608.01(n).

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Takagi et al (6,650,552).

Takagi et al discloses a synchronous rectification circuit (103) with dead time regulation connected (104) to a secondary side of a transformer, an inductor (117), a first switch (113) and a second switch (114) for producing DC power, said circuit comprising: a first switch control circuit (121) connected to one terminal on the secondary side of said transformer and to said first switch (113), said first switch control circuit receiving an input voltage (136) from the secondary side of said transformer to control ON/OFF of said first switch; a dead time regulation circuit (104) connected to said DC power and to said first switch control circuit, said dead time

regulation circuit producing a dead time regulation signal; and a second switch control circuit (122) connected to one terminal on the secondary side of said transformer, to said second switch (114) and to said dead time regulation circuit, said second switch control circuit receiving an input voltage (136) from the secondary said of said transformer and said dead time regulation signal to control ON/OFF of said second switch.

7. Claims 2-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
